

Sponsor program

11th International Workshop on Crystalline Silicon for Solar Cells (CSSC-11) and 4th Silicon Materials Workshop; 20-22 April 2020, Lisbon, Portugal.

This year we offer the participants of the SiMat and CSSC workshops a joint and unique event hosted by Faculty of Science, University of Lisbon. The CSSC workshop focuses on the silicon material and the substrate with strong attention on crystallization. The SiMat workshop focuses on the interface between silicon materials and cell and module technologies. Combining the two workshops will create a fantastic opportunity to exchange knowledge and insight between industrial and scientific participants from the two communities

Topics to be covered by the workshop will be

- Fundamental materials science related to crystalline silicon solar cells
- Silicon feedstock technologies
- Crystallization of multicrystalline, quasi-mono, monocrystalline silicon
- Advanced wire sawing and emerging kerfless technologies
- Novel materials and processing for advanced cell architecture
- Advanced characterization
- and more

In the past, CSSC was held in Sendai, Japan (2006), Xiamen, China (2007), Trondheim, Norway (2009), Taipei, Taiwan (2010), Boston, USA (2011), Aix-les-Bains, France (2012), Fukuoka, Japan (2013), Bamberg, Germany (2015), Tempe, USA (2016) and Sendai, Japan (2018).

	Platinum	Gold	Silver
Physical Space	3x3m ² area with the possibility of practical demonstration. Wifi and power. Possibility of contacting attendees to book demonstrations.	3x3m ² with poster demonstration. Wifi and power.	NA
CSSC11 passes	3	1	1
Logo visibility	Majority logo on website, programme and during sessions.	Majority logo on website, programme and during sessions.	Majority logo on website, programme and during sessions.
Cost	5000 EUR	3000 EUR	2000 EUR

Organizing committee will also provide logistical support. Please contact CSSC11@fc.ul.pt
